ÉTHIQUE DES DONNÉES

## Our vision

In the digital context, the responsible company must develop its data ethics approach. For us, data ethics is "a collective process of accountability, commitment and integrity that allows us to build the values and principles that guide our actions in the use of data".

## Our mission

EDOS supports companies and organisations in the implementation of best practices related to data ethics, through its skills and methods:

### Compliance
compliance with the regulation for the protection of personal data (GDPR)

### Cybersecurity
data protection and digital risk management

### Digital transformation
development of a responsible digital culture within organisations (digital sobriety)

EDOS also offers **full support for specific roles and functions** around Data within your organisation:

**Data Protection Officer**

**Risk Manager**

**Chief Data Officer**

## Your challenges
### Use the data with ethics

Beyond the strictly legal and regulatory response, EDOS provides you an accompaniment in defining the best practices to promote within your organisation, allowing you to:

-> **minimize the risks** in the management of your data

-> **develop new assets** through digital services

-> **improve your business and strategic performance** by optimizing the potential of your data
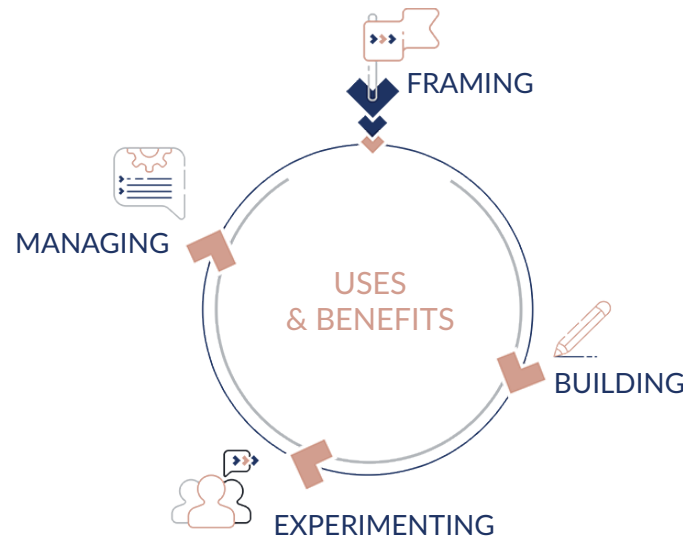

EDOS hopes to develop a center of excellence around data ethics by bringing together multidisciplinary teams and contributing to the academic and research ecosystem.

ÉTHIQUE DES DONNÉES

# Our approach and tools
## A collaborative method based on:

◆ a framework of strong and assertive values (responsibility, integrity, solidarity, commitment) and formalized, pragmatic principles adapted to your context and your business, based on the best practices and standards in the field

◆ an approach based on return on collaboration, feedbacks from the field and regular benchmarks, with spaces specific to collaborative innovation and the implementation of projects using agile methods

◆ high-performance monitoring and management tools that facilitate appropriation, use and deployment, guaranteeing permanent visibility of our support

FRAMING

MANAGING

USES & BENEFITS

BUILDING

EXPERIMENTING

## Objectives

◆ produce useful, usable and used deliverables
◆ promote the transfer of skills to your teams
◆ simplify your exchanges with local, regional, national and cross boarder ecosystems

# Our resources

## Multidisciplinary Team

> Lawyers specialized in Digital Law
> Lawyers specialized in Data Law
> Cybersecurity consultants
> Digital transformation managers

## Methods and Toolbox

> Approach and method frameworks: ISO, NIS, EBIOS RM
> Tool-based project management: performance and value monitoring
> GDPR software Data Legal Drive

## Academy

> Raising awareness
> Organizing Seminars
> Defining new skills

## Edos Academy
# Professional training

## Challenges and best practices in:

> GDPR Awareness
> Cybersecurity Awareness
> Digital Risks Awareness
> Digital transformation
> Data Strategy and Governance: challenges and best practices
